

Project Background

- A West Dover Connector (Saulsbury Road Extension) is an idea for a connector roadway extending south from the intersection of Saulsbury Road and North Street to provide possible connections to New Burton Road and US Route 13.
- The extension of Saulsbury Road was identified in the Comprehensive Plan for the City of Dover and in the Dover/Kent County (MPO) Long-Range Transportation Plan as a project recommended for further study.
- The City of Dover identified a study of the extension of Saulsbury Road as its number one priority on its list of unfunded projects in calendar year 2003.
- The development of the Eden Hill Farm and a West Dover Connector are separate initiatives; each to be evaluated on its own merits.
- The proposed development of Eden Hill Farm provides an opportunity to preserve the right-of-way for a West Dover Connector. This opportunity may be lost if action is not taken now.
